<!--

TODO: Before you release your application, you need a Google Maps API key.

To do this, you can either add your release key credentials to your existing key, or create a new key.

Note that this file specifies the API key for the release build target.

If you have previously set up a key for the debug target with the debug signing certificate, you will also need to set up a key for your release certificate.

Follow the directions here:

<https://developers.google.com/maps/documentation/android/signup>

Once you have your key (it starts with "Alza"), replace the "google_maps_key" string in this file.

-->

<string name="google_maps_key" templateMergeStrategy="preserve" translatable="false">AlzaSyARHEb2AmwSZfdLyX4jsD7DeV_NOnPZDM8</string>
